ABOUT ME

I am a Computer Science student at Metro Business College with a strong interest in technology, programming, and problem-solving. I am currently seeking an internship opportunity where I can apply my academic knowledge to real-world projects and further develop my technical and professional skills.

I am eager to learn, adaptable, and committed to delivering quality work. I have a growing foundation in programming, software development, and basic computer systems, and I am motivated to continuously improve and expand my expertise. I work well both independently and as part of a team, and I am excited to contribute to a dynamic organization while gaining valuable industry experience.

EDUCATION

Metro Business College, Pasay City
Bachelor of Science in Computer Science **Anticipated graduation: October 28 2026**

- **Relevant Coursework**: Introduction to Computing, Programming Fundamentals, The Object-Oriented Programming, Data Structures, Database Management Systems, Algorithms, Software Design and Development, Discrete Mathematics.
- Developed practical skills in software development using languages such as Python, Java, and C++.
- Explored database management concepts through coursework and projects utilizing MySQL.

EXPERIENCES

LBC Central Exchange, Parañaque City **July - Oct 2026**
(IT Department - Internship)

SKILL

Technical Skills

- Programming Languages: Python, Java, C++, JavaScript, PHP
- Development: HTML5, CSS
- Tools: Git, Figma, and Canva
- Databases: MySQL, MariaDB

Soft Skills

- Strong Analytical and Problem-Solving Abilities
- Excellent Communication and Team Collaboration
- Adaptability and Eagerness to New Technologies

LANGUAGES

- English
- Tagalog

PROJECTS

Selected projects are listed below. More projects, source code, and project details can be found in my portfolio: https://paulmendoza24.github.io/main/#projects

Top 3 Projects:

Barangay 84 Management Information System (Capstone)

A comprehensive desktop-based management system built with Java Swing for Barangay 84 Zone 10, City of Pasay. The system streamlines resident record management, beneficiary tracking, and official certificate generation with an intuitive user interface and robust database integration.

Form Automation Management System (Prototype for Research)

Developed for Metro Business College FAMS is a desktop-based document automation system built with Python and CustomTkinter. It streamlines the process of generating personalized documents (such as certificates or letters) for multiple students using a Word template and a student data file.

Camera Detector

A real-time computer vision desktop application built with Python, OpenCV, and MediaPipe. It detects faces, eye landmarks, hands, and motion through a modern CustomTkinter interface, featuring live FPS statistics, snapshot capture, multi-camera selection, and toggleable detection modules optimized with multi-threaded frame processing for smooth 30+ FPS performance.
